Pharmaceutical Validation Qualification

Level 7 University Certificate in Validation Accredited by TU Dublin Ireland & GetReskilled

Developed in consultation with the pharma industry including **Pfizer & MSD**.
accredited by **TU Dublin university** Ireland.

John Smiddy completed Pharmaceutical Validation Training Course 2021.
With over 25 years' experience in equipment specification, installation, and
commissioning in the chemical and pharmaceutical sectors. Completing this
course, turned my validation work experience into a university certification.

As an experienced C&Q and CQV engineer **SMIDDY(IMSC)Ltd**. provide services in
the following areas, Installation, Commissioning and Validation.

New and refurbished process equipment Installation Qualification (IQ)

Successful IQ is typically measured by how well the installation process followed the
OEM's guidelines and meet their requirements.

Operational Qualification (OQ)

Providing operational qualification (OQ) after meeting each protocol of IQ. The
purpose of OQ's s to determine that equipment performance is consistent with the
user requirements and specification (URS) within the manufacturer-specified
operating ranges. In practice, this means identifying and inspecting equipment
features that can impact final product quality.

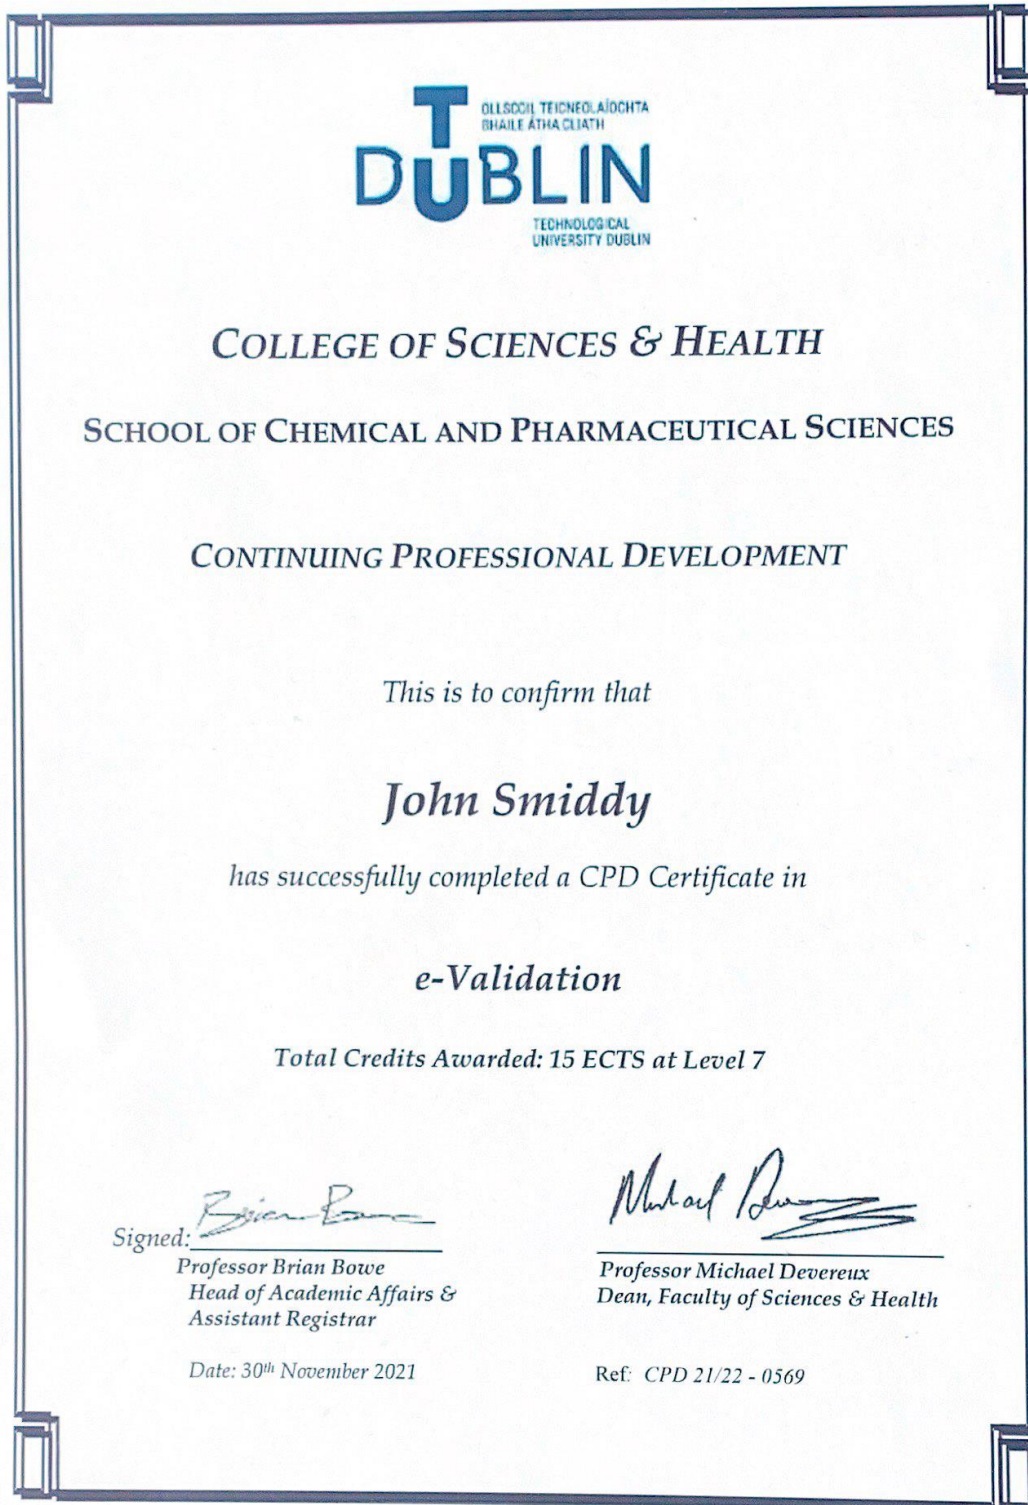

Performance Qualification (PQ)

The final step of qualifying equipment PQ. In this phase, as part of the qualification
and validation team we verify and document that the equipment is working with
reproducible results, within a specific working range and in line with user requirements
specification (URS)

COLLEGE OF SCIENCES & HEALTH
SCHOOL OF CHEMICAL AND PHARMACEUTICAL SCIENCES
CONTINUING PROFESSIONAL DEVELOPMENT

This is to confirm that

John Smiddy

has successfully completed a CPD Certificate in

e-Validation

Total Credits Awarded: 15 ECTS at Level 7

Signed: 
Professor Brian Bowe
Head of Academic Affairs &
Assistant Registrar

Professor Michael Devereux
Dean, Faculty of Sciences & Health

Date: 30th November 2021

Ref: CPD 21/22 - 0569
